FINAVIA 'S AIR TRAFFIC CHARGES IN 2009

Changes in Finavia's air traffic charges have been modest in comparison with actual inflation rates during the last few years. The goal of keeping the increase in charges down to about half of the inflation rate has usually been reached.

The average change in traffic charges in year 2009 is similar to this year, i.e. about +1,1 %. Compared to the forecast inflation level for 2009 (2-3 %) the increases in traffic charges are in line with Finavia's pricing targets.

The pricing changes which are now carried out on the basis of customer consultations are smaller than originally proposed by Finavia.

Detailed pricing changes are presented in the following:

- **En route charges** will decrease somewhat in the beginning of next year. The national unit rate will decrease from its present level of 40,28 EUR to 40,23 EUR per service unit. Eurocontrol's administrative charge of 0,16 EUR will remain unchanged and consequently the total route charge will decrease from the present amount of 40,44 EUR to 40,39 EUR per service unit.
- The most significant change in next year's charges is associated with the **terminal navigation (TN) charge**. The increase in TN charges is 11 % on an average and consists of the following actions:

- A new SES formula has been introduced as a weight coefficient, which favours aircraft with take-off weights less than 50 ton.

$$\sqrt{\frac{MTOW_{ton}}{50}} \longrightarrow \left(\frac{MTOW_{ton}}{50}\right)^{0,7}$$

- Unit prices by airport category have been raised.

Airport Category	From 1.1.2008	From 1.1.2009
ATC1 airports	140,00 €	147,00 €
ATC2 airports	105,00 €	123,00 €
AFIS airports	70,00 €	70,00 €

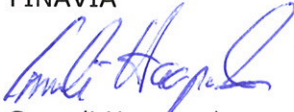

- A new **assistance service charge** (PRM charge) will be introduced 1.1.2009. The charge is based on the EC regulation about the rights of disabled persons and passengers with reduced mobility in air traffic (EC No 1107/2006). The amount of the assistance service charge is 0,20 EUR per departing passenger, and it is applied to the same passengers as the passenger charge. More information about the service: <http://www.finavia.fi/informationreducedmobility?>

- **Season cards**, which apply to aircraft with MTOW not exceeding 2000 kg, will experience a 2 % inflation adjustment in the beginning of the year.
- **All other air traffic charges (landing, parking, passenger, security, noise, and electricity charges) will remain at their present level.**

All air traffic charges will be published in detail on Finavia´s www-site:
<http://www.finavia.fi/forairlinesandaviators?>
